LUNCH AND LEARN WEBINAR SERIES
WI-FI ESSENTIALS FOR IT PROS

THE ESSENTIAL WI-FI MAINTENANCE AND MONITORING TOOLS FOR IT PROS

Agenda
- Successful (Wi-Fi) network best practices
- Proactive network upkeep & maintenance
- Fastest path to resolution

Successful (Wi-Fi) Network Best Practices

PLAN   VALIDATE   DEPLOY   MONITOR & TROUBLESHOOT
Hamina Planner/ Plus   Hamina Onsite   Hamina + AP Vendor   Hamina Live View
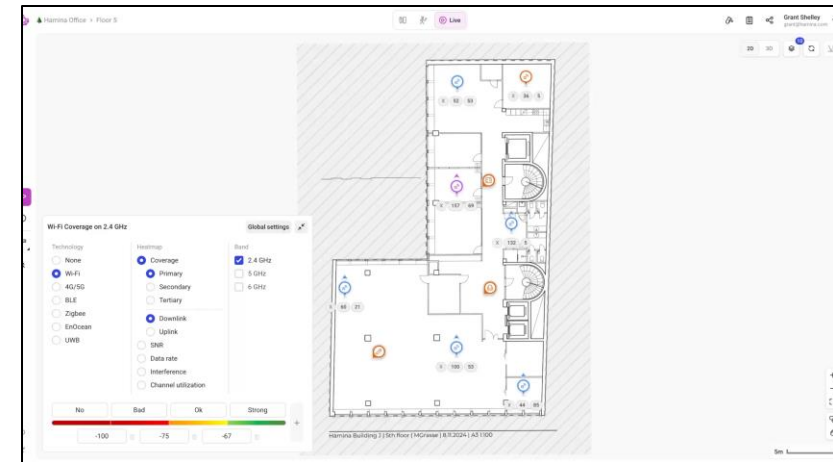

Hamina   → Auto-deploy →   AP Vendor   → Live RF Data →   Hamina
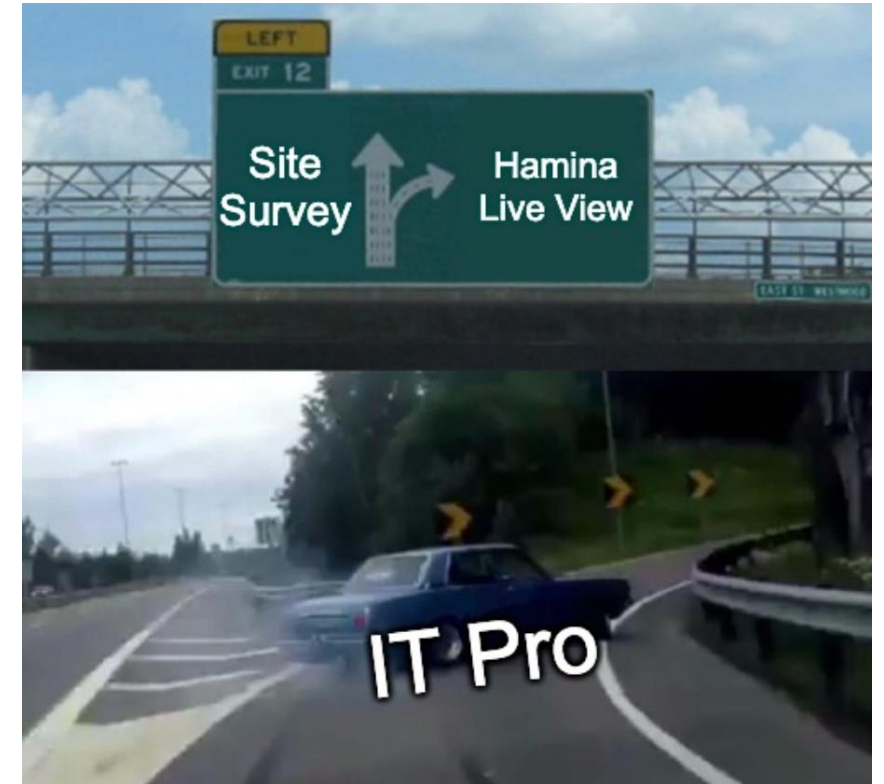

Hamina

Proactive Network Upkeep & Maintenance

- Design process = best chance of initial project success
  - "An educated guess"
- Survey process = simulation vs real world
  - Relevant data on Day 1, but what about Day X?
- How can IT Professionals maintain their networks over time?
  - Solution must be:
    - Fast
    - Easy to use
    - Visually relevant
    - Provide real actionable results

Hamina

Fastest Path to Resolution

- Truck roll scenario
- Onsite survey
  - Hamina Onsite + Nomad
    - Coordinate w/ site
    - Intermittent issue
    - Travel considerations/ costs
- Hamina Live View
  - Planner Plus
    - Simple API key entry
    - Instant RF visibility
    - Network visibility
    - Client visibility
  - Alt use cases
    - Site audits
    - Remediation efforts
    - Redesign
